## PRODUCT BULLETIN: PB#B3002

DATE: January 28, 2003  
REF: RD11KF-D and RD11KF-N  
SUBJECT: 2003 Ford F450 with new 6.0L Diesel Engines  
EFFECTIVE: Immediately

As part of the new 6.0L diesel engine package, Ford has equipped F450 trucks with a new square tube drive axle for the 2003 model year. This new axle may prevent TTT's ReycoGranning® RD11KF-D and RD11KF-N suspensions from being installed and operated properly. Therefore, effective immediately, we do not recommend the RD11KF-D or RD11KF-N suspensions for use with the 2003 Ford F450 cab chassis trucks equipped with the new 6.0L diesel engine.

TTT is currently at work to resolve this issue and we will make updates to the suspension as necessary. We expect to have this resolved within the next 30 days.

This does not affect gasoline powered trucks nor any of the other ReycoGranning® RD line.

For detailed assistance, please contact your Tuthill Transport Technologies Account Manager at 800-255-7824.
