PRODUCT BULLETIN: PB#B3004

DATE: February 18, 2003
REF: RD975F, RD11KF, RD1350F, and RD1700F
SUBJECT: "Ping" Tanks
EFFECTIVE: Immediately

In the past, Tuthill Transport Technologies' ReycoGranning® product has provided air spring assist tanks, or "ping" tanks, as a means to further reduce the dynamic spring rate of the suspension and improve the ride. The "ping" tanks operate by adding additional working volume to each air spring.

Some customers have found that the resultant increased recovery time, from air-dumped suspensions, and increased air compressor demand, due to ping tanks, has not been suitable for their applications. Therefore, TTT is removing the "ping" tank kits as standard components from the RD975F, RD11KF, RD1350F, and RD1700F suspensions. The kits will be available as an option and must be ordered separately with the unit based on the customer application needs.

For detailed assistance, please contact your Tuthill Transport Technologies Account Manager at 800-255-7824.
